

Fantasy Football Stats Writeup 2024

Matthew Guzman

January 10, 2024

1 Introduction

Congratulations to all on another great season! We made great strides this year with the development of the website, online roster submissions, and live scoring on our own platform. Thanks to everyone for bearing with us through various bugs and issues - despite some hangups, this season was hyper competitive and really fun.

This writeup provides a few stats that Turner and I found particularly interesting this season. There were a lot of close calls, interesting matchups, and surprising upsets, and it's exciting for us as commissioners to look back on the ups and downs.

For those who are in a rush, here are three quick stat takeaways for this season:

1. Tyreek Hill and Ja'Marr Chase were the two most rostered players, both rostered 25 times total throughout the season.
2. Skid Marks dominated this season in total points. Both cumulatively and on average, he consistently had one of the highest weekly scores in the league.
3. While there were many interesting matchups, I would highlight the incredible matchup between The Good Guys and the Kingpins of Crime in Week 6. Incredibly, The Good Guys took this one by 0.02 points.

For those with more time, the next few pages give more detailed tables and graphics with some key takeaways from the season. Let us know if there any particular stats that you want to see in the future too!

2 Player Stats

This section presents the highest overall scorers in each offensive position. Note that the scores presented here only include the 14 weeks of our fantasy regular season, so they could differ from current ESPN or Yahoo fantasy rankings.

Table 1: Quarterbacks

	Passing		Rushing		Regular Season Fantasy Points
	Yds	TDs	Yds	TDs	
Josh Allen	3,447	25	374	10	307.28
Jalen Hurts	3,192	19	460	12	291.68
Dak Prescott	3,505	28	185	2	272.70
Lamar Jackson	2,934	16	644	5	253.76
Brock Purdy	3,553	25	138	2	249.92

Table 2: Running Backs

	Rushing		Receiving		Regular Season Fantasy Points
	Yds	TDs	Yds	TDs	
Christian McCaffrey	1,177	12	437	5	311.40
Raheem Mostert	924	16	170	2	237.40
Travis Etienne Jr.	806	9	383	1	226.90
Rachaad White	745	5	419	2	204.40
Alvin Kamara	564	5	402	1	201.60

Table 3: Wide Receivers

	Rushing		Receiving		Regular Season Fantasy Points
	Yds	TDs	Yds	TDs	
Tyreek Hill	15	0	1,542	12	322.70
CeeDee Lamb	84	1	1,253	8	283.70
Keenan Allen	6	0	1,243	7	278.86
A.J. Brown	0	0	1,258	7	255.80
Ja'Marr Chase	-6	0	1,092	7	239.32

Table 4: Tight Ends

	Rushing		Receiving		Regular Season Fantasy Points
	Yds	TDs	Yds	TDs	
Travis Kelce	0	0	896	5	197.60
T.J. Hockenson	0	0	839	5	196.90
Sam LaPorta	4	0	702	6	176.60
George Kittle	2	0	811	6	170.30
Evan Engram	0	0	701	3	170.10

Also, the following graph shows how the actual NFL teams measured up in terms of average weekly fantasy points. No surprise that Dallas and Miami topped the chart. Also, this graph has changed a lot from last year to this year. Kansas City is down from the top berth last year, and Tennessee is up from the bottom.

Tannehill was rostered exactly one time, but he did relatively well that week (shoutout to The Funks).

Table 6: Top 5 Fantasy Scorers Rostered Fewer Than 5 Times

Player	Position	Times Rostered	Average Points
Jake Browning	QB	2	25.18
Ryan Tannehill	QB	1	21.04
Anthony Richardson	QB	4	17.25
Tyjae Spears	RB	4	15.83
Kenny Pickett	QB	2	15.06

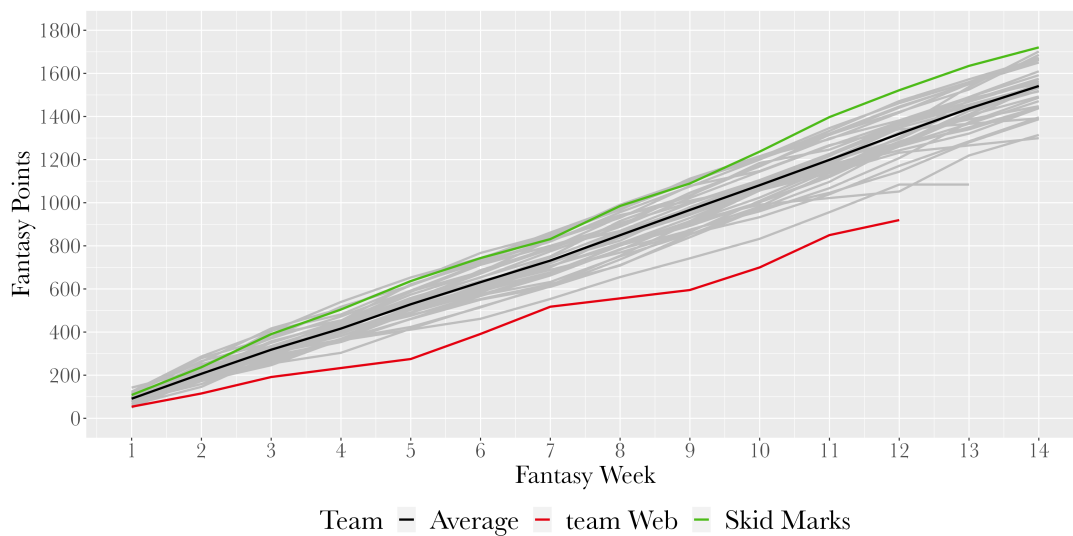

Also notably, the following table lists players who were rostered exactly one time. Tannehill appears on this list again, and there are a smattering of other solid players who were only rostered one time throughout the season.

Table 7: Top 5 Fantasy Scorers Rostered Exactly 1 Time

Player	Position	Times Rostered	Average Points
Ryan Tannehill	QB	1	21.04
Michael Carter	RB	1	8.40
Justice Hill	RB	1	8.30
Kylen Granson	TE	1	7.90
Nelson Agholor	WR	1	7.90

Regardless of players rostered, most teams this season followed similar trajectories in terms of total points. The following graph shows the average cumulative points, and the best and worst cumulative scores are highlighted. Better luck next season Web, and congrats to Skid Marks for consistently being among the highest scorers!

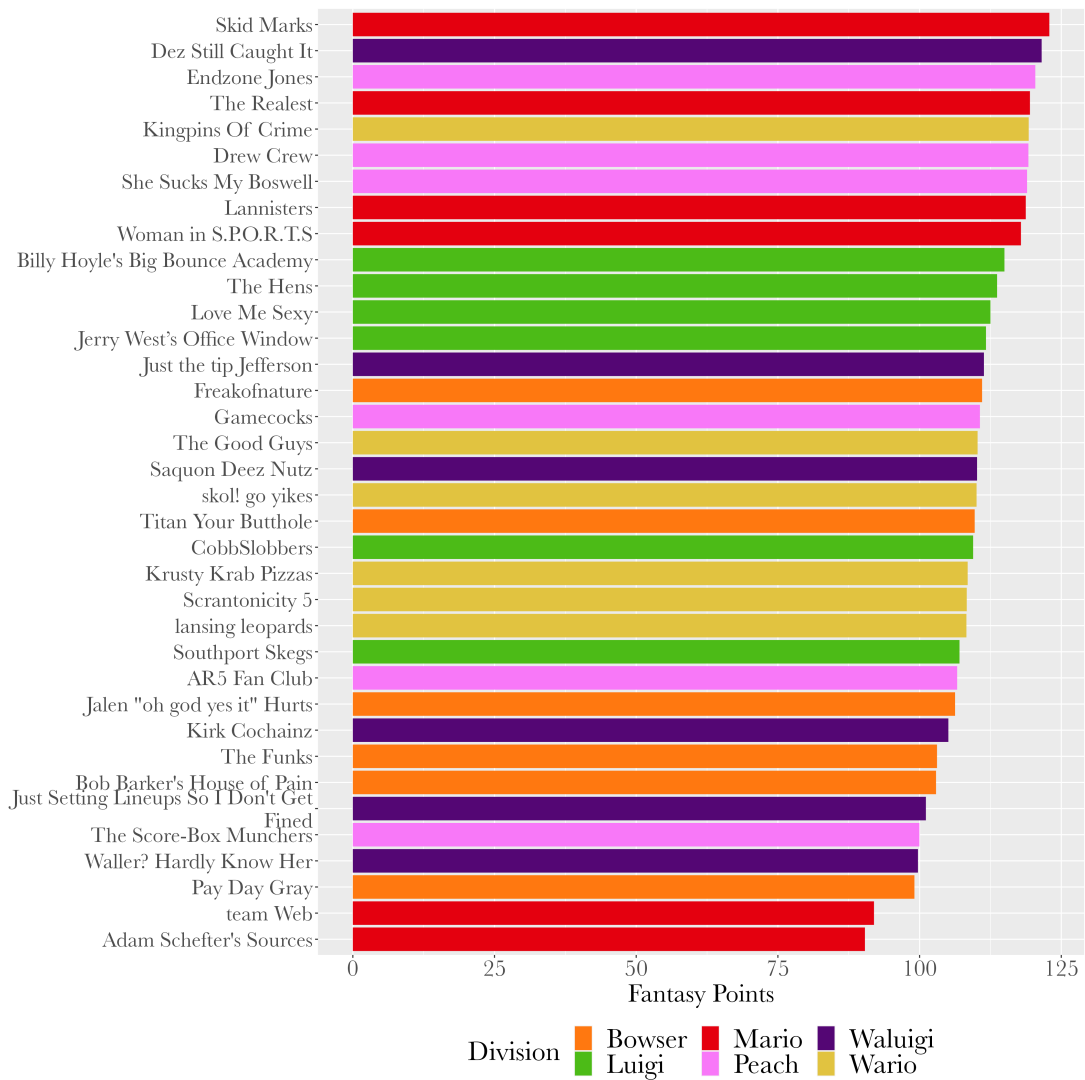

Figure 2: Average Weekly Points Per Roster

In addition to performing well in cumulative points, some teams performed above average every week that they competed. The following graph presents the average total points scored by each manager in the weeks

that they submitted rosters. No surprise - Skid Marks again took the top spot, and the Peach, Mario, and Luigi divisions dominated the highest average scorers.

Figure 3: Average Weekly Points by Team

Kudos are definitely in order for the Mario and Peach Divisions. They were extremely competitive in terms of total points, and the Wario and Bowser divisions were decidedly less competitive in terms of weekly point totals.

4 Matchup Stats

This section presents some tables related to particular matchups.¹ The first of these tables presents several matchups in which teams won or lost by less than a point.

¹Note that tables in this section ignore empty rosters.

Table 8: Closest Matchups

Week	Winner	Winner Points	Loser	Loser Points	Margin
6	The Good Guys	90.94	Kingpins Of Crime	90.92	0.02
12	The Funks	122.74	Bob Barker's House of Pain	122.10	0.64
10	Love Me Sexy	116.80	Jerry West's Office Window	116.08	0.72
12	Scrantoncity 5	107.24	Endzone Jones	106.06	1.18
11	Adam Schefter's Sources	123.54	lansing leopards	122.30	1.24

Next, the following table presents the biggest blowouts. Whether as a result of an all Monday lineup, insufficient research, or just bad luck, some teams were absolutely walloped this season. Lannisters led the charge for Biggest Blowouts by beating Web by over 100 points in Week 3, and Dez Still Caught It somehow made it on this list twice.

Table 9: Biggest Blowouts

Week	Winner	Winner Points	Loser	Loser Points	Margin
3	Lannisters	177.16	team Web	76.34	100.82
13	Dez Still Caught It	193	Kingpins Of Crime	108	85
12	Dez Still Caught It	145.08	Just Setting Lineups	60.80	84.28
2	Woman in S.P.O.R.T.S	160.42	Pay Day Gray	78.50	81.92
8	skol! go yikes	164.36	lansing leopards	86.08	78.28

Next, the following table presents the "most shafted" matchups. These were extremely high scoring matchups in which both contenders likely would have dominated any other opponent. The rosters for these matchups were excellent, and the losers just had the bad luck to be against a slightly better roster.

Table 10: Most Shafted

Week	Winner	Winner Points	Loser	Loser Points	Combined Points
12	lansing leopards	168.56	Kingpins Of Crime	144.40	312.96
13	Just Setting Lineups	167.20	lansing leopards	141.92	309.12
13	Love Me Sexy	170.50	Pay Day Gray	135.58	306.08
5	Southport Skegs	168.84	Saquon Deez Nutz	124.36	293.20
9	Gamecocks	152.26	Jalen "oh god yes it" Hurts	138.48	290.74

Finally, the last table presents low-scoring affairs. These were sneaky competitions in which both teams rostered low-scoring players, but they still edged out the competition. Kudos to lansing leopards and Love Me Sexy! Well done playing low-scoring rosters and getting a win!

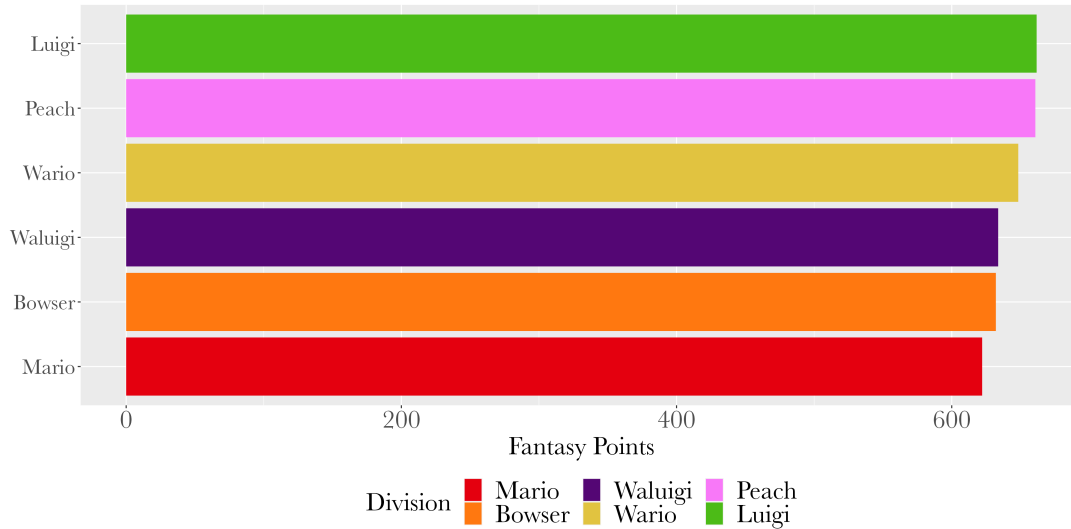

Table 11: Low Scoring Affairs

Week	Winner	Winner Points	Loser	Loser Points	Combined Points
11	Lannisters	83.34	skol! go yikes	61.64	144.98
1	lansing leopards	97.42	team Web	53.78	151.20
4	lansing leopards	76.96	The Realest	75.16	152.12
7	Love Me Sexy	90.84	Waller? Hardly Know Her	61.30	152.14
1	Love Me Sexy	87.48	Just the tip Jefferson	65.08	152.56

5 Division Stats

With a weekly average of 161 points, the Luigi Division just barely edged out the Peach Division for the highest average weekly points. Great showing by those contenders despite the unreal dominance of Skid Marks and End Zone Jones throughout the season!

Figure 4: Average Weekly Points by Division

6 Division Wins per Week

Finally, the following figures present each team's cumulative wins through week 14 in their division.

Figure 5: Mario Division Total Wins per Week

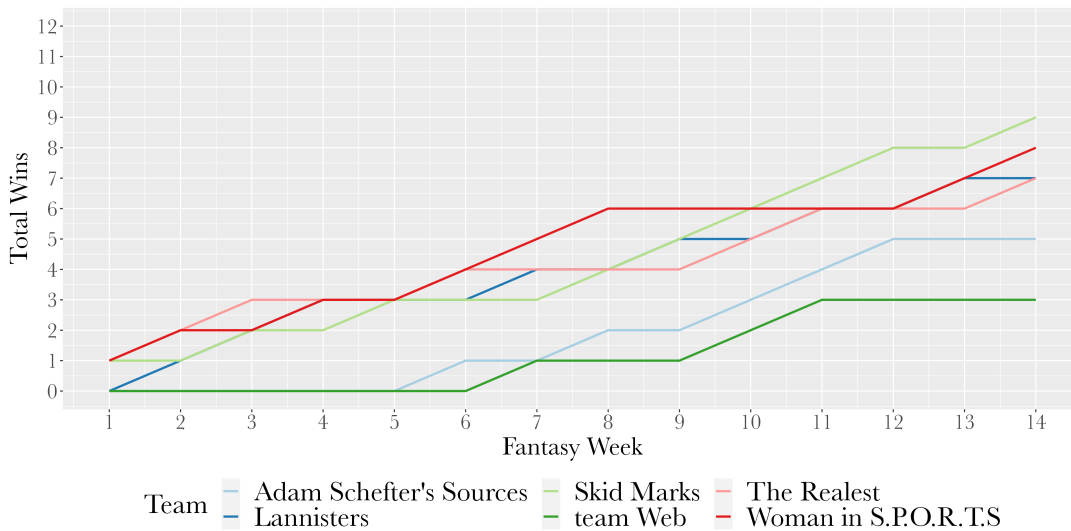

Figure 6: Bowser Division Total Wins per Week

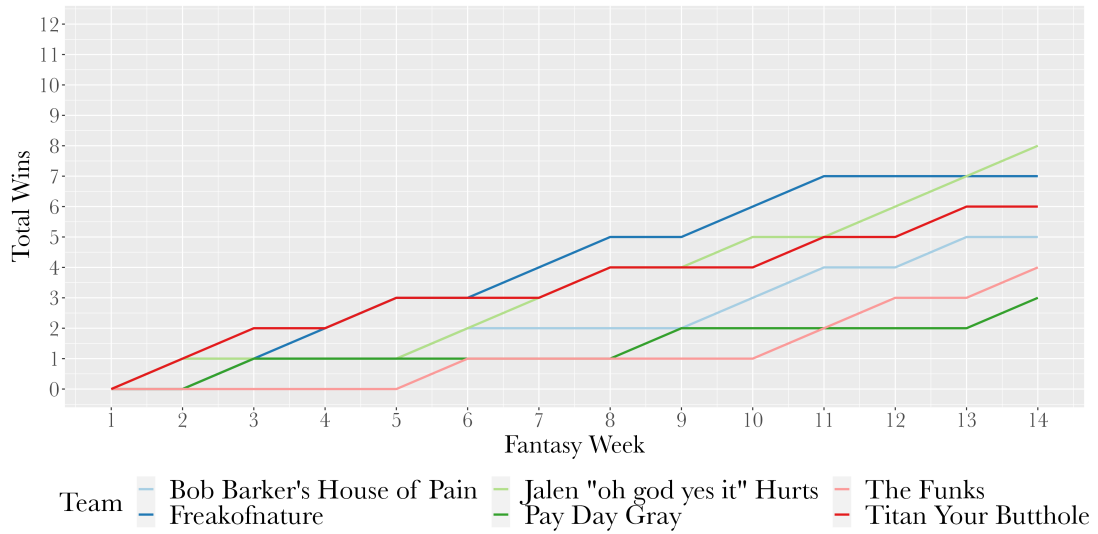

Figure 7: Luigi Division Total Wins per Week

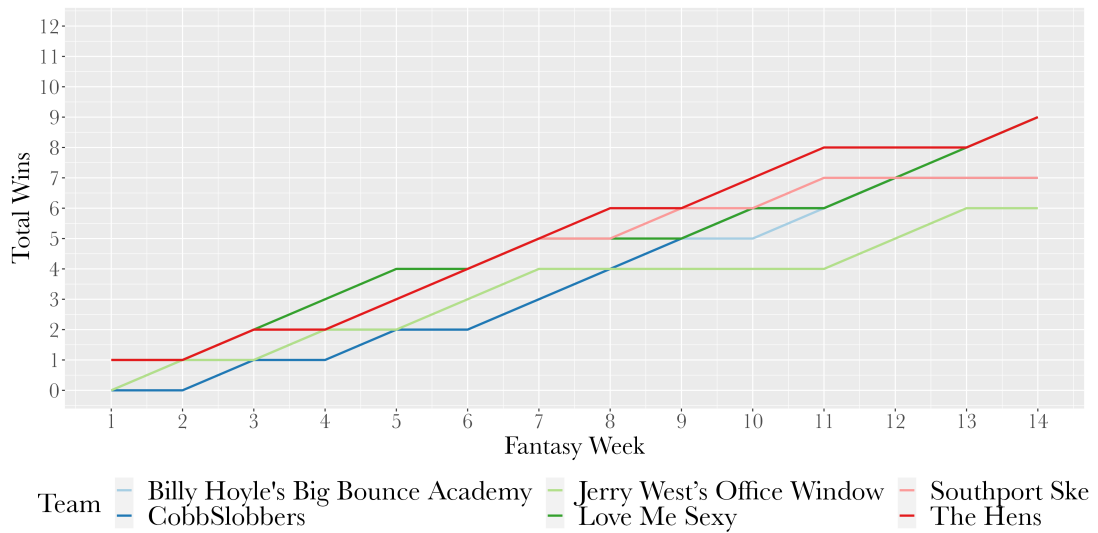

Figure 8: Wario Division Total Wins per Week

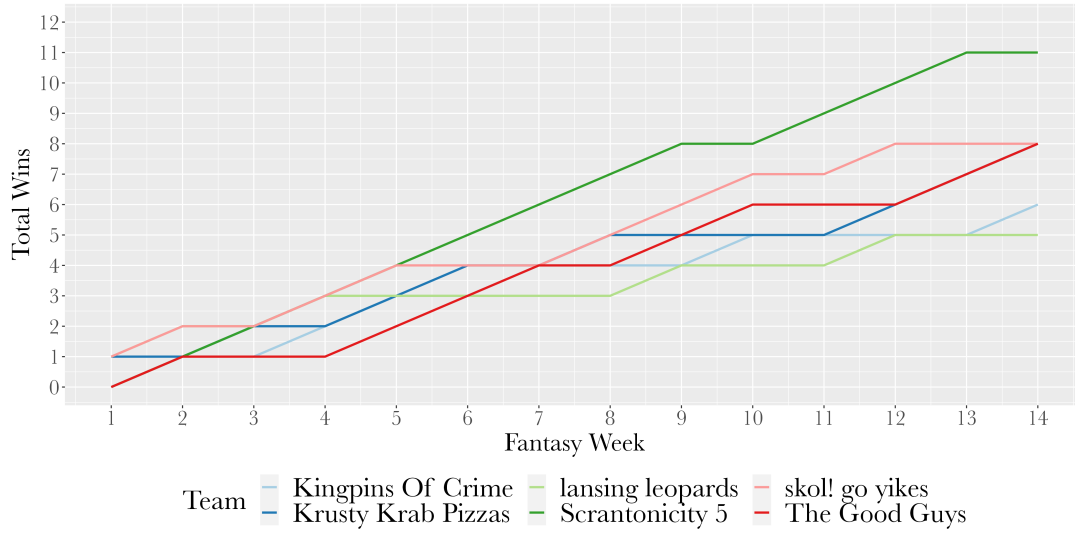

Figure 9: Waluigi Division Total Wins per Week

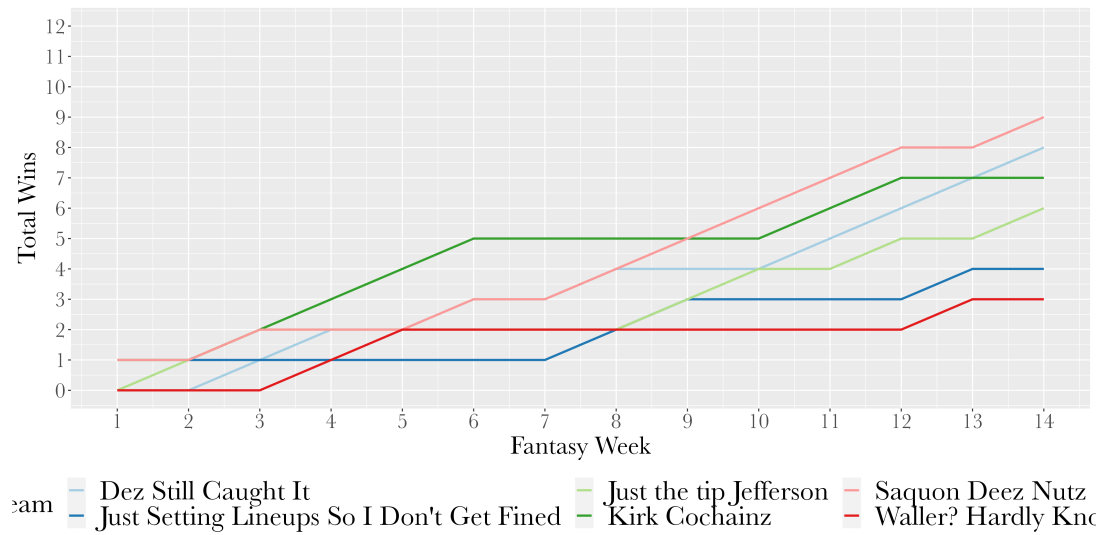

Figure 10: Peach Division Total Wins per Week
